Profile

Full-stack developer and BSIT graduate who has operated a production SaaS since 2022 — building the API, owning the database, and administering the VPS it runs on. Comfortable across JavaScript, PHP, Python and C#, and used to shipping, debugging and maintaining systems that real users depend on rather than projects that stop at submission.

Experience

Creator & Lead Backend Engineer

PandaAuth — pandaauth.com

August 2022 – Present · Solo operator

- Designed and built a script authentication and key-delivery platform serving developers, covering the REST API, key lifecycle, and user dashboard.
- Own the full stack in production: Node.js and PHP services, MySQL schema design, Redis caching, and a Discord bot that consumes the same API.
- Administer the underlying infrastructure — Ubuntu VPS, Nginx, DNS, SSL and Cloudflare — including incident response and uptime.
- Handle release management, customer support and abuse mitigation without a team.

Web Developer Intern

Eversoft IT Solutions

November 2025 – February 2026 · 500-hour internship

- Built backend features for a clinic web application in Python and Django, working to team code standards and review.
- Implemented data models, authentication and internal endpoints supporting patient and appointment records.

Selected Projects

PandaBlox

- Script workspace and editor with an in-browser code environment; authored 65 of 67 commits.

React 18 · TypeScript · Vite · Express · Prisma/MySQL · Redis · CodeMirror 6

VeggieScan — Undergraduate Capstone

- Vegetable freshness and contamination detection combining a YOLOv8 vision model with an LLM for result explanation.
- Received Best Oral Presentation at the capstone defense.

Python · YOLOv8 · LLM integration

Financial Management System

- Private expense and budgeting tool with AI-assisted categorisation; amounts stored as integer centavos to avoid float drift.

Node 22 · Express · SQLite · EJS · DeepSeek API

Technical Skills

Languages

JavaScript TypeScript PHP Python C#
SQL

Frontend

React Tailwind Bootstrap EJS Vite

Backend

Node.js Express Django .NET
REST APIs

Data

MySQL MongoDB SQLite Prisma Redis

Operations

Linux Nginx DNS & SSL Cloudflare
Git / GitLab Docker

Education

BS Information Technology
